DISCOVERY™ SERIES
Selectorized Line

PRECOR®

Discovery™ Series Selectorized Line

Both you and your exercisers will appreciate the combination of biomechanics and aesthetics of the Discovery™ Series Selectorized Line. It combines all the functional performance elements demanded from a strength line, along with the design and attention to detail you expect from Precor.

Key features of the Discovery™ Series Selectorized Line include:

- **Appearance** – Creates an open and inviting environment to everyone within the facility with a new consistent low-profile tower height and translucent shrouds.
- **Durability** – The 11-gauge steel and fully-welded boxed frame provides a rock solid foundation that will not bend, flex or creak under heavy loads or over time.
- **Precision Adjustments** – Highly visible and durable touch points including the industrial gas-assisted seat adjustments, over-molded rubber handles, selector pin, and add-on weight.
- **Ease of Use** – Large, text-free instructional placards with QR codes linked to instructional videos make getting started easy for all exercisers.

Advanced Movement Design™

Your exercisers will experience greater strength through the Advanced Movement Design, exclusive to the Discovery Series Selectorized Line.

This progressive platform challenges the body in a way that engages more muscles to functionally develop strength and stabilizes movement patterns. Exercisers will experience better results as they work their muscles through a greater, more natural range of motion.

- **Progressive Platform** – Natural step for exercisers as they build upon their strength routine with added variety and enhanced core stabilization.
- **Natural Movement** – The converging/diverging axis allows exercisers to push/pull on a more user defined plane to provide greater range of motion and muscle recruitment.
- **Ergonomic Design** – Angled movement arms, elliptical shaped handle grips, and an improved pulley system design ensures exercisers experience a smoother, more natural and fluid motion.
- **More Effective Workouts** – Independent movement arms demand greater balance and core muscle engagement from your exercisers.

Instructional Placards

Large, easy-to-see, text-free illustrations that demonstrate correct form and muscle usage at a glance. QR codes provide smart phone links to instructional videos.

Weight Tower

The Line features a consistent low-profile tower height and a translucent shroud that create an open and inviting workout environment.

Adjustments

The highly durable, industrial-grade ergonomic materials make it easy and comfortable for exercisers to get the right fit, with precise adjustments for seats and weights.

Upholstery

Exercisers will be more comfortable thanks to the premium pads and upholstery - and you'll appreciate the two-textured fabric that features double-top stitching on all seams, for extra durability.
